## Learning Fast

Theoretically, the United States should leave must and very fact from such allies on Consider and Raghtont they fact from such allies on Consider and Raghton they into the suce earlier than we did. Even our best relitary non-re-somewhat this amendate strategists when bourse to the worf row not said of the consist. In reality our leaders, there is more at less three the Considers and Raghtic and nonlarismath the surface more real cooperation is going on-

Reports occasionally appear that American officers and government leaders are uswilling to accept the advice or to learn from the experience of allied nations. Such cases do exist but there are also many angles, political and otherwise, to the reports and the incidents which involve taking advice from friendly matisas.

One of the rord amoning incidents, in learning from allule autions, became a misser political stores in this country and indicates the many difficulties in detelling what is ignored artice, when motivos of our allies are really outful to us, and many other questions. The amoning incident gree around the appointment of a disease to a position in the early set-up of the Office of Chillian Deferms. The lady and the contract of the contract of the contract of the increase of the contract of the co

Experience in England had shown that to teach children creatian form of group density was one of the bost very to centred them in the midd of danger. England had been bombed, of cream, and the people there knew how inpurious the way to be able to central children in an emergency. But this courty differ get the idea at 31, because we had never been bombed. The case shows how difficult is, is to grid ideas from all castion, and especialty to get the people to use them. Many an idea borrowed from Cumda and England with turn out to be more pollutal fedder.

Looking basieward, one of the best preparations the United Static could have made at the beginning of the war in Nursepe would have been to send large detachments of officers and num to observe the fighting as it progressed. Then they would have been ready to instruct our new armées. I remember in the first World War what an effect it had to be instructed by men who had been there and who

had actually been in the fighting. But this is another lack of preparedness we can blame on the isolationists.

We should be able to learn a lot from Canada and Eagland on taxation and financing a war. Apparently there is an hencest direct to study the plane that have been tried in both those countries, and fee once some credit can be given to newspapers that try to give the American people real information on taxes in other antises shebolar us, but were,

The first of learning from each other is ginet to begin with the mesony quiest careful to either Countl, England with the mesony quiest careful to either Countl, England with the country of the country of the country of the country of the totally the either country of the country of the country of the totally the country of the country of the country of the country of the totally of the country of the countr

The United States has made good effort to been what whe fore some liberium by watching with Lappers in Claude and England. A recent government reports again that searching must be done in this contribute in the done in this contribute in the done in this contribute in the done in this contribute is considered to the contribute of the

These are some of the many fields in which we can been an a nation from those contines that began be there are a train from those contines that began to the first fact denocacy earlier than we did. As we fight together to win, both military and widt bessere can be learned, becan learn frees these said they can learn frees them as the said to the control of the said to the said to
